AES Crypt
for iOS

Advanced File Encryption for Windws, Mac, Linux and iOS.

Reliable, trused, and completely free software.

STEP 1

Encrypt a file on your Mac, PC or Linux using the free software at AESCrypt.com

Then upload the encrypted AES file to your favorite cloud storage.

Dropbox

STEP 2

Open the same cloud storage software on your iPhone or iPad and select the encrypted file uploaded in step1.

Select your encrypted file

Touch the "export" icon and select "Open In..."

Select "Open in AESCrypt"

Open in AESCrypt

STEP 3 AESCrypt will open and prompt you for your file password. Then your file will be decrypted and ready for viewing in iOS.
